Rule 10.	Schedule Rating Plan – Group Accounts (cont'd)
-----------------	---

Employees (+/-5)

The applicant has established a continuing professional education program for its employees and encourages certification in their respective specialties. There must be a statement in the employee handbook advocating continuing education. The Medical Group agrees to pay all or some of the tuition fees and/or related educational expenses. Further, the composition of the Medical Group will be 50% or greater of the employee population having board certification or similar advanced degrees for a maximum credit to be granted. If the percentage is lower, but still substantial, and the other criteria described above are met, a lesser credit may be granted. If none of the above, a debit will be made.

Risk Management (+/-5)

The applicant has an established and working risk management program to minimize the frequency and severity of claims. A Medical Group which has an incident reporting system, occurrence screening, and other mechanisms to address potential and actual claims would receive a maximum credit. If none of these mechanisms are in place, a debit will be made.

Medical Records/Informed Consent (+/-5)

The applicant has a system in effect for concurrent and retrospective review of medical records and informed consent documents. If the Medical Group has a medical records system only or an informed consent system only, no debit or credit is available. If both systems are in effect, a credit is available. If neither system is in effect, a debit will be made.

Performance of experimental procedures (+5)

If the medical group practice includes procedures that are considered experimental, but that are performed within the prescribed guidelines, controlled studies, or : “protocol” established by the manufacturer or similar entity, there will be no debit or credit, however if the experimental procedures are not subject to the protocol, a debit of up to 5% will be applied. Since the underlying program’s rates reflect the assumption that insureds will not be performing experimental procedures, no credit will be given under any circumstances and under this category i.e. there will be no credit if experimental procedures are not utilized.
